Introduction

TRIADEM StylePlugs are especially designed to expand the existing Adobe Photoshop tools, adding fashion design functionality. The modules are directly integrated in the program to allow a seamless workflow.

System Requirements

Operating system: Mac OS X 10.7-10.10. (64-bit)
 Windows 7 (64-bit)

Host Application: Adobe Photoshop CS6 / CC

Adobe Photoshop system requirements for your version can be found at www.adobe.com. TRIADEM StylePlugs are installed into a running Adobe Photoshop environment.

Installation

The TRIADEM StylePlugs can be installed easily. Insert the installation CD into your disk drive and open it. Now copy the folder "TRIADEM StylePlugIns" into the Photoshop "Plug-Ins" folder located on your hard drive. This concludes the installation procedure. You can now reopen Photoshop and start using the TRIADEM StylePlugs.

Attention: It is not possible to use the program from CD! The TRIADEM StylePlugs are AddOns to Adobe Photoshop and NOT executable outside the host application!

Installation path:

MacOSX 10.7-10.10. (64Bit):

Macintosh HD > Programs > Adobe Photoshop CSx > Plug-Ins

Windows 7 (64Bit):

C: > Programs > Adobe > Adobe Photoshop CSx > Plug-Ins

Beware Windows 64Bit: Make sure to install the plugins in the 64-bit environment of the Photoshop software! In some cases the 32-bit version is installed in this location: C :> Programme x86...! Don't use this folder!

Registration

You will be asked to enter a serial number as soon as you open the TRIADEM StylePlugs within Adobe Photoshop. The serial number of your PlugIn can be found on the registration card sent along with the software installation CD.

The registration dialog box features the TRIADEM logo in the top left corner. The main text reads: "Please enter your company name and plug-in serial number below :". Below this, there are three labels on the left: "Photoshop® Serial", "Company", and "Plug-In Serial". The "Photoshop® Serial" field is pre-filled with the text "95479629892271533569XXXX". The "Company" and "Plug-In Serial" fields are empty text boxes. At the bottom of the dialog, there are two buttons: "Trial" and "OK".

Please note, the entries are case-sensitive! Confirm by clicking the **OK** button. When entering a wrong serial number, the software will start in trial mode.

Trial version

To test the software without entering the serial number, click on button **TRIAL**. The demo version allows you to test all functions of the TRIADEM StylePlugs. The only limitation applies to rendering the resulting image to the Photoshop file.

PlugIn Overview

The TRIADEM StylePlugs are integrated into the Adobe Photoshop interface. You will find the PlugIns under the following menu points:

ColorList: PlugIn for easy mixing of collection colors
Modules: ColorList
Where: acts as color picker
 Specify ColorList as color picker:
 Preferences > General > Color Picker > ColorList

Repeater: PlugIn for pattern repeats and all-overs
Modules: Repeater, Hidden, Wrapper
Where: File > Automate > Repeater
 File > Automate > Wrapper

The Hidden PlugIn acts in the background and is therefore not shown in the program interface. It is required for the work of the Repeater module.

Coloration: PlugIn for color reduction and colorways
Modules: Coloration, Variator
Where: Filter > TRIADEM StylePlugs > Coloration
 File > Automate > Variator

Weaver: PlugIn for woven fabric simulation
Modules: Weaver
Where: Filter > TRIADEM StylePlugs > Weaver
